

FACT SHEET

3631 IP Wireless Telephone

Overview

The Avaya 3631 IP wireless telephone is designed for organizations that want the convenience of wireless communications and the benefits of leveraging IP-based converged communications solutions. This wireless telephone connects to your existing WLAN, simplifying the management of your communications infrastructure. Wireless voice solutions enable users to be available even when away from their desk, offering dramatically enhanced productivity. The 3631 is optimized for office environments. It does not require any servers, and is an excellent complimentary product to a deskphone. Users can seamlessly handoff calls between the 3631 and their deskphone, and the 3631 offers an Avaya one-X™ Deskphone interface.

Avaya 3631 offers dramatic efficiency improvements, and unlike a mobile phone incurs no costs for usage. Since all calls are over WLAN infrastructure, no per minute costs are incurred and no service provider minutes are used. No servers are required and it works with existing WLAN infrastructure.

Capabilities

The Avaya 3631 IP wireless telephone is designed to meet the business needs of office environments. You can remain productive while away from your desk, with capabilities such as make and receive phone calls (including Caller ID), place calls on hold, establish conference calls, and check for messages. The navigation keys provide the user with easy and efficient access to additional capabilities through the display.

The 3631 features a one-X Deskphone compatible user interface with a color display, a four way navigation key and soft keys that can be used in exactly the same way as you use your one-X Deskphone, giving you all the comfort you are used to and avoiding the need to learn to use a new device.

The 3631 wireless telephones support the following:

- 128 x 128 backlight color display
- 4 hours talk time, 40 hours standby time
- 802.11b and 802.11g standard-compatible
- Headset jack (compatible headset list see below)
- Speakerphone
- Polyphone audible and vibrating alerting
